

Environmental Policy

Aegina Technologies Limited (ATL) manufactures precision engineered components to the aerospace, oil, gas and underwater industries.

It is committed to the concept of reducing to a minimum any actions that have an adverse effect on the environment. This commitment extends not only to its own actions but also to advice given to its customers, suppliers and subcontractors. It supports this commitment by operating to the ISO 9001 and the Aerospace AS 9100 Quality Management Systems.

In conducting its business it aims to prevent pollution and to save natural resources by operating in the most environmentally efficient and friendly way and by recycling wherever this is practical. This is done by not only keeping its use of materials down to a minimum but also its use of non-renewable resources such as mineral oil, petrol, diesel and indirectly, of electricity. Waste is segregated and returned for re-use or recycling wherever practicable.

This commitment extends to all areas of its business. It further aims to continually improve its environmental performance in order to safeguard the quality of the environment, both locally and globally. To facilitate its commitment it operates as followed:-

Legislation and regulations

All applicable legislation and regulations are adhered to at all times and it is company policy to keep up to date and implement the requirements of all new environmental legislation.

Management responsibilities

Management are responsible, both individually and collectively, for communicating to all employees the environmental needs of the company and for enacting the environmental policy of the company. Environmental objectives and targets are set and monitored by management.

Local requirements

It is the aim of ATL, irrespective of any regulations or legislation, to be a good neighbour and to reduce to an absolute minimum any environmental impacts from its working practices and processes.

Review of environmental policy

ATL reviews its environmental performance and this policy on a regular basis.

Communication

This environmental policy is displayed on the company notice boards, is enclosed with quotations or estimates, when appropriate, and is also submitted with our advertising literature.
