

Quality Policy

Our objective is to develop steady growth with ongoing investment thus creating a profitable business by providing first class technology resource to the company's customer base.

A major factor in success will be our commitment to the principles of Total Quality Management. These principles are;

- To meet or exceed our customers requirements and expectations on every occasion
- To continuously improve our products and services
- To continuously improve our processes in line with ISO 9001 & BS EN 9100
- To involve our employees, suppliers and business partners in the improvement of our business and to share our success with them.
- To continuously improve the effectiveness of the Quality Management System
- To set achievable goals and objectives and review them at business review meetings

We will continually review our company policy by self-assessment during quality review meetings, internal audits and external audits.

We will also maintain compliance with ISO 9001 & BS EN 9100
